#### REMARKS

2016 was a year of contrasts, starting with a mild and rainy winter followed by a spring which remained gloomy right up until late June. The growing cycle was delayed accordingly, but flowering occurred during a precious spell of dry weather which ensured that the fruit was plentiful and of consistent quality. Summer was exceptionally dry, with no rain on over 100 days throughout 2016, halting the growth of the vines in time for the grapes to mature perfectly. A welcome dose of rain in early September tempered this maturing process at just the right time, without sacrificing the concentration accrued over the hot, dry summer. Finally, a dry and mild start to the autumn gave us an exceptionally generous amount of room for manoeuvre when it came to selecting the right harvest dates. These conditions have combined to produce wines of rich colour and dazzling aromatic power, whose balance of tannins, acidity and smooth texture will make for both short-term pleasure and long-term joy.
